Overview

Founded in 2016, Practical Trading Services has strategically evolved from a specialized trading enterprise into Sudan's premier integrated solutions provider. Operating from our headquarters in Khartoum, we identify critical infrastructure gaps and deliver innovative, sustainable solutions that consistently exceed client expectations.

Our remarkable growth trajectory reflects our unparalleled ability to anticipate emerging market needs, develop technically advanced solutions, and cultivate enduring partnerships built on demonstrated results and unwavering trust. Today, we stand as the recognized industry leader in transformational infrastructure projects across Sudan.

Corporate Mission

Transforming Complex Challenges into Strategic Opportunities

We convert multifaceted challenges into actionable opportunities through integrated solutions that create sustainable value for communities, organizations, and stakeholders, driving measurable impact and long-term prosperity.

Guiding Principles

- **Operational Excellence:** Implementing robust, efficient solutions precisely engineered for challenging environments
- **Scalable Innovation:** Developing forward-compatible systems designed to evolve with expanding requirements
- **Environmental Stewardship:** Creating solutions that balance technological advancement with ecological responsibility
- **Knowledge Transfer:** Building local capacity through skills development and technological empowerment

Strategic Business Units

Renewable Energy Division

We deliver comprehensive solar energy solutions optimized for Sudan's unique climate conditions:

- **Advanced Solar Configurations:** Custom-designed grid-tied, off-grid, and hybrid systems
- **Agricultural Solar Solutions:** Industry-leading solar irrigation systems increasing crop yields while reducing operational costs
- **Proprietary Energy Management:** Intelligent systems maximizing production efficiency and resource utilization
- **Performance Guarantee Program:** Ensuring consistent system output through comprehensive monitoring and maintenance

Our end-to-end methodology encompasses detailed energy assessment, precision engineering, professional installation, and proactive performance management designed specifically for commercial enterprises, industrial applications, humanitarian operations, residential developments, and agricultural producers.

Water Technologies Division

Our advanced water treatment portfolio addresses the complete spectrum of water management challenges:

- **High-Efficiency Filtration:** Multi-stage systems removing contaminants with exceptional precision
- **Advanced Membrane Technology:** State-of-the-art reverse osmosis solutions delivering pharmaceutical-grade water quality
- **Intelligent Chemical Dosing:** Automated systems ensuring optimal water conditioning with minimal chemical usage
- **UV Disinfection Platforms:** Chemical-free pathogen elimination systems with real-time monitoring
- **Circular Water Solutions:** Innovative wastewater recovery systems dramatically reducing freshwater consumption
- **Maritime Desalination:** Resilient seawater conversion systems providing consistent freshwater supply

Infrastructure & Logistics Division

We execute complex infrastructure projects with meticulous attention to quality and sustainability:

- **Turnkey Civil Engineering:** Comprehensive development from site preparation through final construction
- **HYDRO-SEAL™ Waterproofing:** Proprietary technology providing unmatched protection against water ingress
- **Humanitarian Supply Chain:** Specialized procurement and logistics for emergency response operations
- **Integrated Logistics Management:** Streamlined material flow from international sourcing to final delivery
- **Critical Equipment Provisioning:** Strategic sourcing of specialized machinery and technical equipment
- **Chemical Supply Programs:** Reliable procurement of industrial chemicals with rigorous quality control

Digital Infrastructure Division

Our telecommunications and digital solutions enhance operational efficiency and communication capabilities:

- **Enterprise Mobility Solutions:** Comprehensive device management programs for organizational efficiency
- **Custom Technology Ecosystems:** Tailored hardware configurations supporting specific operational requirements
- **Strategic Device Lifecycle Management:** Proactive maintenance protocols maximizing technology investments
- **Specialized Assembly Operations:** Precision device configuration for optimal performance and security

Leadership Excellence

Our executive team combines world-class expertise with strategic vision and proven operational leadership:

Khider Ahmed - *Managing Director*

A visionary leader with over 15 years at the forefront of sustainable infrastructure development, Khider orchestrates our strategic initiatives and organizational growth with exceptional insight into complex market dynamics and cross-sector partnerships.

Altyeb Habeeb - *Technical Director*

Internationally recognized for his expertise in renewable energy systems and water

treatment technologies, Altyeb ensures our solutions integrate cutting-edge innovations while maintaining exceptional reliability under challenging operational conditions.

Eng. Mohammed Ahmed - Project Manager

A highly organized and results-oriented Project Manager with 15+ years of experience in delivering complex infrastructure projects. Proven ability to lead cross-functional teams, manage budgets effectively, and ensure on-time project completion while maintaining high quality standards.

Mohammed Fakhri - Operations Director

With specialized experience managing multifaceted projects across diverse environments, Mohammed delivers seamless execution through advanced project management methodologies and rigorous quality assurance protocols.

The Strategic Partner Advantage

Collaborating with Practical Trading Services provides access to an unparalleled strategic partnership designed to drive transformational outcomes:

Consultative Intelligence - We conduct comprehensive analysis of your unique challenges, constraints, and objectives through a proprietary evaluation framework

Solution Architecture - Our engineering teams develop custom-tailored systems optimized for your specific operational requirements and environmental conditions

Implementation Precision - We execute with meticulous attention to detail, adhering to international quality standards while ensuring timely delivery

Continuous Optimization - Our dedicated support teams provide ongoing performance monitoring, preventive maintenance, and system enhancements to maximize long-term value

Adaptive Evolution - We continuously refine our approach based on performance analytics and emerging technologies to ensure sustained competitive advantage

Distinguished Client Portfolio

Our solutions have earned the trust of leading organizations across multiple sectors:

International Organizations

- International Committee of the Red Cross (ICRC)
- World Food Programme (WFP)

Energy & Financial Institutions

- Bashayer Pipeline Company
- Workers National Bank

Manufacturing & Commercial Enterprises

- DAL Dairy Factory (Capo)
- Ambico Company
- Chicano Restaurant (all branches)

Educational & Healthcare Institutions

- Nile Valley School and Kindergarten
- Al Hegra Student Hostels
- Alnelan Medical Centre (Khartoum & Omdurman)

Additional Strategic Partners

- Almymoon Company
- Moroj Company
- Physical Environmental Center of Khartoum
